The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 38-40 and 42 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Melvin '562.

Melvin suggests golf balls having a dual core and dual covers. The core is made of a rubber base, crosslinker, initiator and modifying ingredients (col 5 line 25). The modifying agent can be polypropylene (col 6 line 53). Polypropylene is known to have a softening point much higher than 38°C. The cover can be a totally neutralized ionomer (col 17 line 60). Simultaneous use of a polypropylene containing with a totally neutralized ionomer in the cover would have been obvious if not considered anticipatory.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

Art Unit: 1712

USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 31-42 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-34 of U.S. Patent No. 6284840. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent also claims golf balls having a core identical to that of applicant (eg claim 33). The patent allows for any cover material. It is clear that the patentee intends ionomers and urethanes (col 12 line 54) to be encompassed by the generic "cover".

Claims 31-42 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-29 of U.S. Patent No. 66762244. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent also claims golf balls having a core identical to that of applicant (eg claim 1). The patent claims urethane and ionomer covers (claims 20, 24). The instant claims are broader than the patent in the sense that two covers are not required.
